CAREER SUMMARY Hard-working web developer currently attending The University of Arizona, with 5+ years of work experience.Leverages knowledge of conflict resolution, customer communications, and procedure standardization to effectively build apps from start to finish in collaborative environments.

Technical Skills and Projects

Dog Dash:

My first project was a website that incorporated application programming interface or (API) into a Html page. It takes a zip code value and searches for dog parks in a 10 mile radius, and also gives the temperature of that zipcode. We used chart.js to display most searched zip codes to see what the most searched zips were. We connected that to our firebase database to store all the zip codes.
